

Reduce Risk and Increase Efficiency

TechnoMile's Contract Lifecycle Management (CLM) platform makes managing the government contract lifecycle easier and reduces risk, while providing 360-degree visibility across all of your contracts and contract types. This is accomplished by streamlining the arduous tasks of digitizing your contracts and managing clauses, as well as automating your workflows. We leverage optical character recognition (OCR), enhanced with machine learning, to parse contracts and digitize the ingestion of contract information. This results in improved efficiency for your contracts team and reduced risk across your contracts.

Capabilities

Contract Lifecycle Management

Get a complete, pre-built contract onboarding and tracking system for all contract types, providing unmatched contract governance and automation.

Supplier Management

Easily manage the onboarding process of subcontracts and the compliance flow-downs affiliated with each opportunity, with automated validation and document management.

Document Management

NDA's, Teaming Agreements, and SOWs are automatically created and stored, so you can save time and accelerate business processes.

Government Contract Intelligence

Our system leverages OCR, enhanced with machine learning, to parse contract documents and organize key clauses and assets to be leveraged in the context of your business, creating actionable intelligence.

Risk Management

Our solutions utilize AI to identify and automatically alert you when a contract has the potential to meet a risk threshold. This enables you to assess, remediate, and monitor risk across subcontractors, opportunities, and contract types.

Mod Tracking

Track mods in the context of the original opportunity to reduce data entry and improve profitability and customer relations over time.

Contract Library

Our contract library includes a configurable FAR, Supplemental Clauses, and DFARS clause library to streamline the process of tracking the clauses that matter most to your organization.

CLM Platform

The TechnoMile CLM platform provides advanced tracking to help navigate and get ahead of contracts and opportunities faster and more efficiently. Our platform provides workflows and functionality that include:

- FAR/DFARS Clause Library
- Milestone and Delivery Date Tracking
- CDRL and Mod Tracking
- Subcontractor Flow-Down Tracking
- Configurable Approvals and Alerts
- ERP Integration
- Facility and Location Search
- One-Click Document Templates
- AI Supported Risk Management
- CLIN and SubCLIN Tracking

Customers

About TechnoMile

TechnoMile is a leading provider of innovative cloud solutions that empower companies to pursue, win, and retain more business with the government from capture through contract. With TechnoMile's best-in-class cloud platform, companies gain unique competitive insights, source contact intelligence, automate and de-risk the contract lifecycle, foster stronger relationships with partners/suppliers, and, ultimately, gain a competitive advantage.
