

WinIt CRM

Build Your Pipeline & Execute to Win

WinIt is a GovCon CRM (Customer Relationship Management) solution designed for growing small businesses, coupled with AI-enabled opportunity and market intelligence. WinIt provides all the essential tools you need to build and execute your company's pipeline, a simplified CRM experience for rapid user adoption, and a turnkey solution that gets you up and running quickly. And, because WinIt is built on the Salesforce platform, GovCons benefit from highly scalable, secure cloud infrastructure that easily grows with your business. Join the community of thriving, diverse GovCon small businesses that rely on TechnoMile to mature and digitally transform their business processes and accelerate revenue growth.

Level Up Sales Efficiency & Effectiveness

WinIt is built for small businesses, providing everything you need to successfully execute your pipeline of federal opportunities, delivered through a simplified, user-friendly interface. Centrally track all your BD and capture efforts, making collaboration and knowledge sharing easy. Take advantage of pre-loaded federal accounts and contacts, eliminating the need for other subscription-based services and accelerating your federal sales efforts. Leverage tools like the opportunity scorecard and Pwin calculator to drive consistent, efficient opportunity management processes across your entire team and ensure they're focused on the right activities, at the right time, maximizing their effectiveness. Rely on GovSearchAI – TechnoMile's market and contact intelligence platform – for critical intelligence about competitors, potential partners, and agency contacts as you refine your win strategies. Plus, leverage WinIt's dashboards and reporting for easy visibility into pipeline and sales trends.

Leverage AI to Find Best-Fit Opportunities Fast

WinIt comes with GovSearchAI, our market and contact intelligence platform that consolidates and enriches data from top federal sources, including USAspending, FPDS, SAM, FedConnect, and procurement forecasts. GovSearchAI's proprietary, AI-powered algorithm evaluates your company's publicly-available past performance details and then continuously sifts through expiring awards and new solicitations, generating a Clarity Score that highlights the relevancy of each new lead. The result is an intelligent workstream of highly-relevant potential opportunities for your team to evaluate, allowing you to focus on the strongest opportunities to fill your pipeline. Users can push the details of any lead to WinIt in one click, speeding opportunity creation in your CRM.

Streamline Task Order Notices into One Workstream

WinIt also includes GovSearch NoticesIQ, which unifies all your company's task order notices into a single workstream and provides valuable, AI-powered opportunity insights. With Standard and Premium options available, our solution can ingest all task order email notices your organization receives from the government, as well as notices from any contract vehicle portal that employs standard security protocols. Our proprietary, AI-powered algorithm then reviews each notice, along with all its attached files, generates a Clarity Score to showcase its relevancy, and summarizes key details about the task order, including required capabilities. The result? Your team sees a prioritized list of highly relevant notices to review and, rather than digging through attachments, already has the information at hand to rapidly qualify task order leads, saving significant time.

Invest in a Future-Proof Solution That Can Grow with Your Business

With WinIt, you don't have to worry about outgrowing your technology investment. TechnoMile offers a full range of purpose-built solutions for GovCon to support every phase of your business's growth, making it easy to add new capabilities as your needs mature and evolve. And, because WinIt CRM is built on the Salesforce platform, layering TechnoMile's best-in-class capabilities that optimize BD and capture processes onto proven, world-class technology, you get all the benefits of Salesforce's scalable, flexible, and secure cloud infrastructure. All this makes WinIt a future-proof investment that equips your organization for sustained growth.
